

SPIRAL CLASSIFIER

MADE IN INDONESIA

SPIRAL CLASSIFIER

Spiral Classifier is designed to accommodate any process requirement in several industries. SIKO Spiral Classifier is a unit, completed with the stair, handrail, and platform.

The inlet feeding come into an open tank of the unit and then the transport spiral will continuously wash and separate the coarse particles from the fine particles and liquid upward through the inclined tank, the coarse materials will be dewatered by drainage in the upper part of the spiral before discharge.

Total Solution for Customer Satisfaction

STANDARD DIMENSION

Model	D (mm)	L1 (mm)	L2 (mm)	W (mm)	H1 (mm)	H2 (mm)	Motor (kW)	rpm	Capacity (T/H)
S-CF-45	450	5500-6200	3300-3700	1500-1800	1100-1300	1500-1700	2.2	12	5 T/H
S-CF-60	600	6200-7000	4300-4900	2100-2400	1300-1500	1700-1900	2.2	12	9 T/H
S-CF-75	750	7000-7800	4900-5500	2400-2700	1500-1650	1900-2150	4.0	12	14 T/H
